

BEST PRACTICES

ScheduleInterpreter® and Intuit QuickBooks online can work as a single environment sharing operational and financial data. This best practices will help you to simplify and streamline your use of both platforms.

ACCOUNTS

Intuit QuickBooks online uses chart of accounts **COA** to centralize management and reporting. Dividing financial data between multiple accounts helps to produce better reporting and manage the financial records with more accuracy.

All accounts divided into several categories. ScheduleInterpreter® usually operates with revenue, expense and liability accounts.

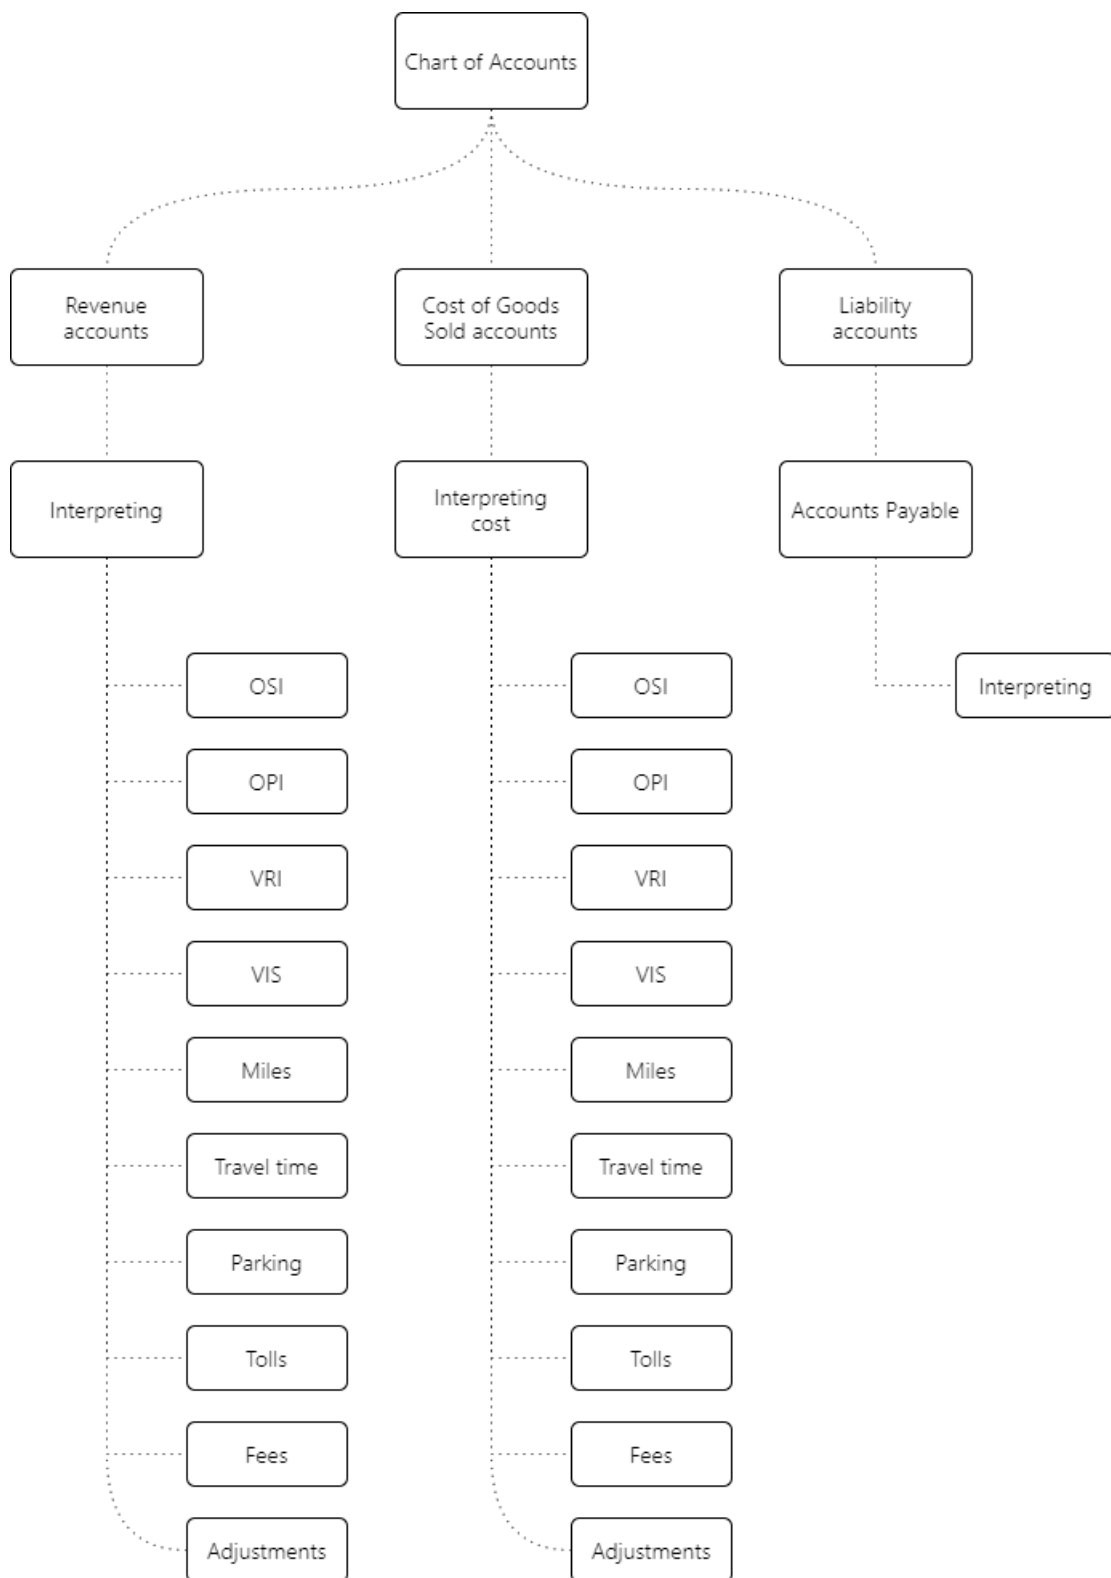

CLASSES

To further improve quality of data, ScheduleInterpreter® provides option to classify transactions using type of account and name of the service. When activated, classification of transactions takes place automatically and does not require additional steps. It is recommended to utilize services as classes.

REVENUE, EXPENSE AND LIABILITY ACCOUNTS

ScheduleInterpreter® supports **COA** with two or more hierarchical levels of revenue accounts. Below is a recommended structure of the revenue and expense accounts for language service providers.

QuickBooks limitation on using the same name applies to income and revenue accounts. To avoid conflict, use the word **cost** after all expense accounts.

Consider to download `coa - best practices.csv` file to use for import into QBO.

INCOME ACCOUNTS STRUCTURE

Create structure for income accounts starting with the Interpreting account. If you already have an account under which all income is being grouped, add sub-account, using Is sub-account option and selecting income account already configured in QBO.

Account

Account Type

Income

*Detail Type

Service/Fee Income

Use **Service/fee income** to track income from services you perform or ordinary usage fees you charge.

For fees customers pay you for late payments or other uncommon situations, use an Other Income account type called **Other miscellaneous income**, instead.

*Name

Interpreting

Description

☐ Is sub-account

Enter parent account

Cancel

Save and Close

When it is important, continue building structure by adding more accounts associated with billable items. Use Is sub-account option and selecting Interpreting from income account.

VRI cost	Cost of Goods Sold	Other Costs of Services - COS

ACCOUNTS PAYABLE

Accounts Payable or A/P does not require itemization. It is recommended to separate all vendor bills into an Interpreting sub-account of A/P.

Proceed with adding Interpreting sub-account under Accounts Payable (A/P) or A/P account in QBO.

ITEMS

To track revenue and expenses, QBO is using items. Items can be linked to both, expense and revenue accounts. ScheduleInterpreter® will make an attempt to collect all items from your QBO account, to enable easy integration of two products.

Consider to download items - best practices.csv file to use for import into QBO.

Use gear icon in the top right corner

Using items in QBO enables access to the structure of ScheduleInterpreter® and allows advanced reporting and cross reference.

Complete entries for all items. As of May 2021, ScheduleInterpreter® offers the following item synchronization.

On-site interpreting, over the phone interpreting (OPI), video remote interpreting (VRI), remote interpreting service (RIS), travel time, mileage, parking, fees, tolls, per diem and adjustments.

ACCOUNT TYPE

Account type in ScheduleInterpreter® and Customer type in QBO are two identical options. QBO does not allow to automatically populate Customer types. If you plan to use this feature, please make sure to copy all account types from ScheduleInterpreter® to QBO.

Navigate to TOOLS AND SETTINGS > Control center > ACCOUNT SETTINGS > LISTS > ACCOUNT TYPES. All account types used by your organization will be listed there.

ACCOUNT TYPES

Business (system)	EDIT	DELETE
Community organization	EDIT	DELETE
County or city administration	EDIT	DELETE
Court	EDIT	DELETE

ADD NEW ACCOUNT TYPE

Using another tab or window of the browser, open and login to your account in QBO. Navigate to SALES > Customers and click on Customer types button.

Customer types

When screen changes, click on New customer type button.

New customer type

Using the pop-up window, preserving the lower and upper case of the letters, copy all account types from ScheduleInterpreter to QBO.
